

Dinul Iman

Backend & Full-stack Developer · Jakarta, Indonesia

Building fast, clean and reliable backend systems — from payroll to data pipelines.

ABOUT

Hi! I'm Dinul Iman, an Information Technology graduate from Universitas Sumatera Utara focused on backend and full-stack development. Day to day I work with PHP, TypeScript, Node.js and relational databases such as PostgreSQL and Oracle.

My most notable work is the Payroll Management System at PT PELNI, serving around 4,800–5,000 employees — from PPh 21 income tax, BPJS, pension and cooperative deductions to journal integration with Oracle. A favourite achievement: cutting the payroll run from more than 10 minutes to under 1 minute by optimizing stored procedures.

I enjoy work that sits close to data: ETL/ELT, data warehousing and automation. Lately I've also been actively exploring AI coding agents such as Claude Code, Codex and MCP.

TARGET ROLES

Backend Developer / Engineer

Full-stack Developer

Software Engineer

Data Engineer

HRIS / Payroll Technology

EXPERIENCE

Software Developer — Payroll Management System — PT PELNI

- Developed a PHP/CodeIgniter payroll system for ±4,800–5,000 employees.
- Built payroll calculation and processing: PPh 21 income tax, BPJS, pension, cooperative, receivables and salary proration.
- Designed the data integration Oracle → PostgreSQL → payroll → Oracle journal.
- Optimized payroll stored procedures, cutting a run that took >10 minutes to <1 minute.
- Built payslips and payroll reports with JasperReports/JasperServer.
- Managed application environments with Docker / Rancher Desktop.

Backend Developer — Ticketing Application — PT PELNI

- Developed the backend of a ticketing application with NestJS and PostgreSQL.
- Built the shipping insurance module.

Data Structures & Algorithms Lab Assistant — Universitas Sumatera Utara

Jan 2021 — Jun 2021

- Supervised data structures and algorithms lab sessions.
- Helped students understand algorithm implementation and complexity.

Database Lab Assistant — Universitas Sumatera Utara

Jun 2020 — Jan 2021

- Supervised database design and SQL lab sessions.
- Prepared lab materials and graded assignments.

EDUCATION

B.Sc. Information Technology — Universitas Sumatera Utara (USU)

GPA 3.50 · Lab assistant for Databases and for Data Structures & Algorithms.

SKILLS

PHP & CodeIgniter	★★★★★	Laravel	★★★★☆
Yii2	★★★★☆☆	Node.js & NestJS	★★★★☆
TypeScript	★★★★☆	Python & Django	★★★☆☆
Go & Gin	★★★★☆☆	JavaScript	★★★★☆
React & Next.js	★★★★☆☆	PostgreSQL	★★★★★
Oracle	★★★★☆	MySQL	★★★★☆
MongoDB	★★★★☆☆	ETL & Data Integration	★★★★☆
JasperReports / JasperServer	★★★★☆	Tableau	★★★☆☆
BigQuery	★★★★☆☆	Docker / Rancher	★★★☆☆
Payroll & HRIS	★★★★★		

PROJECTS

Payroll Management System — PT PELNI

Payroll system for ±4,800–5,000 employees: PPh 21 income tax, BPJS, pension, cooperative, receivables and proration; Oracle ↔ PostgreSQL integration; payslips & reports via JasperServer. Stored procedure optimization cut the run from >10 minutes to <1 minute.

PHP CodeIgniter PostgreSQL Oracle JasperServer Docker

Payroll ↔ Oracle Integration Pipeline

Data flow Oracle → PostgreSQL → payroll processing → journal back into Oracle, keeping HR and finance data in sync.

Oracle PostgreSQL Stored Procedure ETL

Ticketing Application — PT PELNI

Backend for a ticketing application, including a shipping insurance module.

NestJS TypeScript PostgreSQL

CV Quest

An interactive CV as a browser RPG — yes, the game you're playing right now!
